STIRRING RAWHIDE

I think it is brilliant journalism when you print the anti-RANGE letters to the editor. You have no idea how much this stirs up the rawhide and vinegar in people who live and embrace ranching forever. Don't forget to add your personal thoughts. I love them.

TOM TWISSELMAN, MCKITTRICK, CALIF.

RANGE gets to the heart and meat of most all situations. Thank you so very much for a "worthwhile" magazine!

DON'T UNDERESTIMATE US

I joined the Marines on my 17th birthday with the extent of my mentality being girls, bull riding and hauling hay. I came home from Vietnam after catching part of a booby trap on a night ambush outside the perimeter in Chu Lai, later being discharged from the Naval Hospital [in] Corpus Christi, Texas, with my time in the Marines being up. When

TOO GREEN

I haven't read RANGE for probably more than 20 years. I quit way back when because I thought it was getting too green. My husband was a logging contractor in the Black Hills and I worked hard starting and participating in Women In Timber organizations in a mostly futile effort to save our resource communities and forests. Imagine my surprise and pleasure when I picked up the Fall 2021 issue at a local farm and ranch store, and absolutely loved it! Thanks much for all you have done to

I received my discharge (August 1966, honorably) all I knew was an M60 machine gun and hay hauling. You might say I was pretty confused in a lot of ways, like most of us, not knowing how to live in the world, but I saw some of our finest young men die in the effort, we were told, to stop Communism.

Now let me say to all of the BLMers: If I could make it, anybody could. It's not easy, but living in the greatest country in the history of the world gives us that ability; why do you think everyone wants to be here? It's a country that still stands One Nation Under God, no matter how you choose to believe. One last thing, there are some stupid people who think they'll change this great nation. They might be overestimating their ability and underestimating ours.

THE GOOD, THE BAD, AND THE MARXISTS

Our pro-abortion, Catholic president has really stirred me up. I'm asking you to do me a favor, one that could save many lives.

When I was asked to do a life-size bronze of Mother Teresa, I wrote her for permission. She asked me to wait until one year after she died. She is the pro-life icon of the world. I have pulled many calves out of their mothers. It makes abortion real to me. I would like to think RANGE is not only about cow pies and grass, but Christian too. The murder of unborn Americans is the most important issue facing America today.

ANOTHER WORLD

I found the Summer 2021 edition of *RANGE* and it is a blessing to have your magazine in my possession. The stories took me to a whole other world than what I am in. And the photos—"A Perfect Quarter," "Outback Roundup," and especially "Kinship"—are

phenomenal. I returned from Iraq in 2008 and did not cope well from my experiences as a combat medic. My battle started when I came home. *RANGE* gave me some ideas of when I am released. The outdoors and range life may be more appropriate for this disabled combat vet. Your magazine has given me the hope of possibilities. I believe in your cause, your values and preserving our lands. I do not have much, but I would like to donate 10 postage stamps. If you can't use them, please do not send them back. I cannot receive stamps in the mail. Thank you again.

We have survived the craziness of the past two years fairly well—drought, COVID, deaths of friends and family. I hope you've escaped the COVID—it's evil stuff.

As nearly everywhere, it was horribly dry. Our hay crop was very short. We bought a lot of hay. However, we were blessed with a few storms that kept us from complete disaster.

I wasn't going to renew my subscription 'cause I just get angry reading about our government's invasion in the West. But I can't stand not getting your magazine so I wanna re-up. TOO SERIOUS TO WAIT

Have been enjoying *RANGE* for a long time but had a few tough years. Instead of buying my own subscription, I read my friend's copies for several years. Last week he stopped by to invite me to his funeral. His cancer is worse and he's on hospice. He left the center insert intact, so I will buy my own copy again now. Better yet, I'm buying subscriptions for my grown kids and grandkids. Back when we were ranching and farming, we let the issues wait until winter to read. It was easier to find reading time then, at least until calving season. Now the issues are too serious to put off until winter.

We found a box of old issues at the Idaho City library during a book sale this summer. We are very pleased to put a copy on several flat surfaces around our house as there is so much in an issue we can't digest it all in one sitting in one place. We are 65 and 70 years old and have witnessed a lot of the historic episodes you've covered. It's been great to learn more of what went into the thoughts, laws, struggles and successes in our neck of the woods and beyond. Yours is a very professional journal with articles that may even be republished as current events play out. I especially liked an article about a woman rancher who used the word "neighbor" as a verb.

THE LITTLE PEST

Lee Juillerat's article about the Fee family ["Five Generations, Still Counting" in Winter 2021/2022] jogged my memory. Jim Fee said Jimmy Washoe called him "Tibonatza." When I was seven or eight years old in the early '40s my grandfather would hire a lot of men from the Pyramid Lake tribe for haying in the summer. After a big lunch they would spend some time in the shade.

I was always there, fascinated by the Paiute language. Several times I was referred to as Tibonatza. When asked what it meant, I was told "lazy boy." It probably means "little pest."

SUBLIME BUT SINKING

Do we have a prayer of keeping our "sublime now sadly sinking" wonderful U.S.A. from doing just that? ["Up Front," last issue.] Somehow this administration worries about climate change as all taxpayers are worried about inflation and the number of illegals who break our laws just by entering against our laws. Instead, we knuckle to them with gifts of cash, transportation and housing—even enabling them to vote by printing our ballots in Spanish! 'Tis sad that common sense, especially in government, no longer exists, but the fact that we've become dependent on foreign parts for autos may just wake up a sleeping segment of our society!

CONFUSED IN MISSOURI

The other day I thought I was dreaming. I don’t know what being a Liberal or a Con-

servative is anymore. Meritocracy is a vanishing concept. The principals upon which our country was founded are being ignored and distorted. Religion is being denigrated. Absurd vulgarity abounds in our daily lexicon with little or no resentment. There has never been more easily available information, but stupidity prevails. There have never been more laws or lack of enforcement. Food has never been more plentiful, but few know where it comes from. What does social justice really mean? Who are the white supremacists? I may be one and don’t know it! When did the government take over educating our children? Why am I more dumbfounded and disturbed than ever? It wasn’t a dream!

FANS OF THE OUTFIT

CJ, I just read Linda Meyer’s letter about looking for books by J.P.S. Brown. I am a huge fan of both Tom Russell (who wrote “Tonight We Ride” on Brown in Fall 2021) and J.P.S. Brown, who was a friend about whom I wrote several magazine articles (including for *RANGE*). Joe Brown’s contribution to the literature of the American cowboy was phenomenal. His three best works are: “Jim Kane,” “The Outfit,” and “Forests of the Night.”

“Forests of the Night” should have been a candidate for the Pulitzer Prize in Literature, and “Jim Kane” was close behind. “The Outfit” was an amazing book also that was be-

CHANNELING CHURCHILL

The Democrats have supermajorities in most major U.S. population centers (the states with the highest numbers of U.S. representatives). Democrats control “the message” (the Greta Thunberg message), not just domestically but also internationally. Democrats seek not to just dominate, but to eliminate partisan competition. Democrats furthermore seek to eliminate oil, gas and coal.

The most potent ammunition of the conservative wing of this great Republic has been the fact that common sense eventually wins the day, but in today’s cultural tattooed society, that weapon is not as reliable anymore. Recently heard on NPR that there are now more than 139 gender reassignment clinics in the United States alone, for one example. Bear in mind that this means multiples of actual clinicians who went to actual medical schools for eight years—the former “commonsense” totems of society.

Odd how quickly it’s all happening too. Especially the *laissez-faire* attitudes of the general population. On the other hand, we must channel our inner Churchill and never give up. Never never never.

CJ, FRED & THE DARK AGES

I have read and reread the letter exchange you published in *Up Front* in Fall 2021. I would like to know the location of the small mining town where Fred S. Scott grew up and I wonder if his family members share his attitude. The fake press (whose “reporters” are mostly Ivy Leaguers) has done an amazing job of building the Hate Trump Movement. But I have observed that those who work with their hands, who do not hold “positions” with any government and often own their own businesses, can appreciate what Trump actually *did*—The Wall, making us energy independent, making the economy boom, etc.—and we can forgive his crudeness although he was most often accurate. Many of us talk as he talks and think like that as well.

In less than a year, Biden has destroyed America by canceling most of the good that Trump made possible. Biden and his swamp ilk have abandoned Americans and others, armed our enemies, and made the world doubt our ability to protect them and ourselves. Biden—or whoever is his puppeteer—lies and then proclaims how “kind” he is even as we *see* what is not true. He gives away America and allows criminals, dope dealers, child and women abusers to overrun our country. And who will take care of all the truly needy masses that flood us? Not Biden. Not Pelosi. They have walls. Now he wants to

change the Constitution and the Bill of Rights. When America is gone, there will be no more freedom and we descend into another Dark Age.

MARY BRANSCOMB, LAMOILLE, NEVADA

After you printed my article in “Confessions of Red Meat Survivors” on Wayne Cook (Fall 2021), the Cooks received a wonderful letter from a subscriber in Fruitland, Idaho, who had read the piece. ROD THORSON, VIA FACEBOOK

If Trump supporters are a racist cult then Biden supporters must be a child-fondling cult.—Response by Paul Nettleton, via Facebook

In RANGE, Summer 2021, “Corruption Without Consequences Will Destroy America,” by Scott McKay, several things: (1) Trump was not elected by a mass of Americans; Hillary had the popular vote. Trump had the Electoral College for the win; (2) It is not presidential power to change laws, that’s congressional; (3) We do have a president who can lead if he knows how. Remember President Reagan was an actor; and (4) The Electoral College was set up by the Founding Fathers for just such a circumstance as 2016. They already knew what happened when there was large central government even in 1620—they served the rich and powerful.

Circa 1850-56, Abraham Lincoln said: “Our progress in degeneracy appears to be quite rapid when it comes to this. I should prefer emigrating to some country where they make no pretense, where despotism can be taken pure without the base alloy of hypocrisy.”

NOBODY SPEAKS

I read this statement written by a Holocaust survivor concerning the current situation of

INTERNET

“science, doctors and government” joining forces. I just thought it may be something to consider in Amazing Facts & Quotes. Vera Sharav stated: “The stark lesson of the Holocaust is that whenever doctors join forces with government and deviate from their personal, professional, clinical commitment to do no harm to the individual, medicine can then be perverted from a healing, humanitarian profession to a murderous apparatus.”

Ms. Sharav is one of hundreds of Europeans suing a scientific and medical branch of the United Nations for violating the Nuremberg treaty concerning COVID-19 government procedures in most European and North American nations.

I personally found this to be a stunning statement from “a nobody” who was an eyewitness to how atrocities are slowly “sold” to the masses. I am a 70-year-old Vietnam veteran, healthy enough to have “beaten COVID” with the help of Ivermectin in November without being vaccinated. As Ronald Reagan said when it comes to government, “Trust but verify.” I do not trust our federal “health peddlers” and my distrust has been verified.

very fire-prone area where we have had two major fires in two years. The Sequoia Complex, 181,000-plus acres, and the Windy Fire.

Unfortunately for us, in 2000, President Clinton turned at least 50 percent of the Sequoia National Forest into the giant Sequoia National Monument. We live in a small community of Camp Nelson and Pierpoint Springs. The Windy Fire this year destroyed one of the sequoia groves the U.S. Forest Service was supposed to protect. And without logging—which is why they wanted the monument—the fires destroyed what should have been logged.

I hope that the greenies can see what is wrong. We need conservation and thinning, not preservation. The blackened trees that are left all around are a testament to what should have been done in the last few decades.
